

The ISBI would like to host an African Burn Care Map on their website.

Pan African Map

PAM Project

Jim Gallagher MD, Director of a burn center in New York City

The Idea for PAM -

African burn care professionals are few and separated by vast distances hindering collaboration.

Additionally, there is much interest from the international community of burn care, burn care related NGOs, and others to develop relationships with African burn care professionals to support the care they provide.

The ISBI has endorsed a web-based directory in map format of African burn care sites hosted on the ISBI website.

The Pan African Map will create an easily accessible directory enabling communication and collaboration across the African continent and with the wider world.

The ISBI's mission of "*One World*, One Standard of Burn Care, has inspired this effort.

Proposed Data set for the Pan African Map:

1. Name of burn care facility
1. Location (city, state/province, country)
1. Contact – Name of Leader with email and cell number
1. Language –
 - Language of the burn center
 - Important second language
- 2. *Size – number of burn beds (?) not sure it is needed.***
3. Care for adult burn patients? Yes/No
1. Care for pediatric burn patients? Yes/No
- 1. *Website –hospital or burn care facility – (?)
or hospital designation – tertiary referral, regional referral, private***

On the larger map view only the number of centers in a country will appear.

When you zoom in, the name of the centers and the details in the data set will appear.

Map of Tanzania as an example

PAM – Support Team

Help with input of sites and organization of the effort.

Nikki Allorto MD – South Africa
ISBI representative for the African Region

Gretchen Carrougner RN – USA
Former chair of the American Burn
Association International Outreach Committee
ISBI member

Amr Moghazy MD – Egypt
ISBI representative for the Eastern Mediterranean

James Gallagher MD – USA
Member of the ABA IO

The intension is for **PAM** to begin here at this conference.

We would like each as a leader in burn care in your area to find one of the burn care support team members to be included and get on the map.

Common Questions:

- Questions:
 - Why only Africa?
 - “Vetting” – meaning of being on the MAP outside of Africa
 - Work load of maintenance for the world would be large
 - Lowest resource countries need the infrastructure the most
 - - Why is data set so short?
 - Goal is for communication
 - Make it smaller to produce and easier maintain

Proposed Data set for the Pan African Map:

1. Name of burn care facility
1. Location (city, state/province, country)
1. Contact – Name of Leader with email and cell number
1. Language –
 - Language of the burn center
 - Important second language
- 2. *Size – number of burn beds (?) not sure it is needed.***
3. Care for adult burn patients? Yes/No
1. Care for pediatric burn patients? Yes/No
- 1. *Website –hospital or burn care facility – (?)
or hospital designation – tertiary referral, regional referral, private***
